

IN THE SPECIFICATION

Please amend the paragraphs of the specification as follows:

Please replace paragraph 1031 on page 8 with the following amended paragraph:

Figure 3 is a block diagram showing a typical handset 32, with two highly correlated antenna elements 34 and 35, in accordance with one embodiment. The two antenna elements 34 and 35 are connected to duplexer 36. The duplexer routes signals from a transmitter circuit ~~[[37]]~~ 33 to the two antenna elements 34 and 35, or the duplexer routes signals from the two antennas to a receiver circuit 38. The transmitter circuit ~~[[37]]~~ 33 and the receiver circuit 38 interface, and are controlled by, a controller 39. High correlation exists between the two antennas 34, 35 because the elements 34, 35 that make up the dual antennas are placed closely together.
